Step Inside the Mind of an AI-Powered Attacker

Phishing is evolving.

Today's attackers can use AI to create convincing messages, imitate workplace communications, and make scams feel surprisingly real.

Join us during Cybersecurity Awareness Month for an interactive webinar featuring Maxime Cartier, VP of Human Risk at Hoxhunt.

Wednesday, October 14

10:00 a.m. CT

Scan to register

The session will explore:

- How AI-powered phishing attacks are created
- How publicly available information can make scams more convincing
- The growing use of deepfake voice and video
- Simple habits that can help protect you and Mosaic

Pause. Think. Verify. Report.
